sidewalks easily overlooked are a vital public resource central to local economies communities property rights development and legal controversies over homelessness policing and speech michael pollack explores the on the ground reality of american sidewalks arguing for stronger commitments to maintenance and clear consistent regulation

the subject of this open access publication is the impact of connected and automated vehicles on the european city and the conditions under which this technology can make a positive contribution to urban development the authors put forward two theses that have received little attention in the scientific discourse so far connected and automated vehicles will not become fully established in all sub areas of the city for a long time as a result previously assumed effects from traffic safety to traffic performance as well as spatial effects will have to be reevaluated to ensure a positive contribution of this technology to the mobility of the future transport and settlement policy regulations must be further developed established territorial institutional and organizational boundaries need to be challenged in a timely manner despite or because of the existing great uncertainties we are at the beginning of a phase of yet shaping the possible future in technology development but also in politics urban planning administration and

civil society description of the chapters 1 connected and automated driving the long level 4 mathias mitteregger reflects on the road ahead for automated driving what pathways of technological development induce which kind of spatial effects and planning needs 2 connected and automated driving consideration of the local spatial context and spatial differentiation emilia m bruck and aggelos soteropoulos reflect on the importance of the local context when classifying and estimating the effects of different forms of automated mobility 3 connected and automated driving in the context of a sustainable transport and mobility transformation andrea stickler jens s dingschat and ian banerjee integrate possible potentials of automated mobility in the context of a transformed sustainable transport system part i mobility and transport 4 self driving turnaround or automotive continuity reflections on technology innovation and social change katharina manderscheid reflects on how differing visions of an automated future can be understood with regard to divergent interests in technological development 5 automated drivability and streetscape compatibility in the urban rural continuum using the example of greater vienna aggelos soteropoulos analyses how different street spaces align with technological requirements of automated mobility creating a suitability framework for road spaces in the greater vienna region 6 automation public transport and mobility as a service experience from tests with automated shuttle buses the authors show what types of automated public transport might be used in the future and what can be learned from testing automated shuttle buses in the past 7 delivery robots as a solution for the last mile in the city bert leerkamp aggelos soteropoulos and martin berger describe how automated delivery robots could be contextualized in terms of solving last mile problems and discuss what implications might lie ahead for urban planning part ii public space 8 control and design of spatial mobility interfaces the authors identify the possible implications of automated mobility for mobility interfaces and explore how public spaces could be transformed 9 transformations of european public spaces with avs robert martin emilia m bruck and aggelos soteropoulos use the example of copenhagen to show how public spaces could be transformed in an age of automated urban mobility and benefit from lower car dependency 10 at the end of the road total safety mathias mitteregger discusses how the desire for road safety affects public spaces and how automated mobility influences this discourse 11 integration of cycling into future urban transport structures with connected and automated vehicles looking at the future of mobility lutz eichholz and detlef kurth show that the bike actually offers solutions to many of our current problems and that planning should not forget to integrate cycling into future urban transport structures and systems 12 against the driverless city steven fleming argues for a radical shift in cities towards a highly improved cycling infrastructure eradicating the need for automated mobility part iii spatial development 13 strategic spatial planning smart shrinking and the deployment of cavs in rural japan ian banerjee and tomoyuki furutani show where automated mobility could help tackle pressing issues in rural japan 14 integrated strategic planning approaches to automated transport in the context of the mobility transformation the authors show how new forms of automated mobility could be integrated into mobility systems in diverse spatial structures in the city region of vienna with the overriding goal of the mobility transformation 15 opportunities from past mistakes land potential en route to an automated mobility system looking at the mistakes made in building a car centric environment in the past mathias mitteregger and aggelos soteropoulos identify future areas of urban transformation as a result of a lower demand for car centric infrastructures and businesses part iv governance 16 new governance concepts for digitalization challenges and potentials alexander hamedinger contextualizes the manifold paths towards an automated future with regard to governance and describes how governance concepts might need to adapt in the future 17 how are automated vehicles driving spatial development in switzerland fabienne perret and christof abegg show how automated vehicles are influencing spatial development in switzerland focusing on three different scenarios on the road ahead 18 lessons from local transport transition projects for connected and

automated transport andrea stickler looks at local projects aiming at a transformation of mobility practices and reflects on implications for automated transport 19 connected and automated transport in the socio technical transition jens s dangschat looks at societal transformations in the past and contextualizes automated mobility in terms of a possible socio technical transition ahead 20 data driven urbanism digital platforms and the planning of maas in times of deep uncertainty what does it mean for cavs ian banerjee peraphan jittrapirom and jens s dangschat show how continuous digitalization in cities might affect possible uses and implementations of cavs and their accompanying systems

a practical study to determine facts about the work of collecting cigarette butts from public areas especially sidewalks the main goal is to calculate a fair financial incentive for this type of work the purpose of this study is to provide practical data to convince the provincial government of alberta to institute a deposit program on cigarettes like they now have on pop cans such a deposit program will provide an incentive for people to clean the butts from public areas and provide another source of income for street persons

for years pundits have trumpeted the earthshattering changes that big data and smart networks will soon bring to our cities but what if cities have long been built for intelligence maybe for millennia in code and clay data and dirt shannon mattern advances the provocative argument that our urban spaces have been smart and mediated for thousands of years offering powerful new ways of thinking about our cities code and clay data and dirt goes far beyond the standard historical concepts of origins development revolutions and the accomplishments of an elite few mattern shows that in their architecture laws street layouts and civic knowledge and through technologies including the telephone telegraph radio printing writing and even the human voice cities have long negotiated a rich exchange between analog and digital code and clay data and dirt ether and ore mattern s vivid prose takes readers through a historically and geographically broad range of stories scenes and locations synthesizing a new narrative for our urban spaces taking media archaeology to the city s streets code and clay data and dirt reveals new ways to write our urban media and cultural histories

written in blood is an urgent exploration of how disasters happen and how they can be prevented award winning author and physician brodie ramin trained in prevention through his work in primary care and addiction explores how we can scale up preventative strategies and apply them at a societal level from the wreckage of plane crashes and pandemics to nuclear catastrophes industrial accidents and natural disasters through gripping case studies from the notre dame fire to fukushima ramin dissects the human errors systemic failures and overlooked warning signs that lead to catastrophe at its core the book argues that prevention is not only possible but essential we must act before disaster strikes rather than learning only in its aftermath drawing on frameworks like james reason s swiss cheese model of error and insights from high reliability organizations ramin shows how risk compounds when safeguards fail and how layered defenses can save lives he offers a critical intervention by adopting a prevention mindset and overcoming our cognitive biases we can proactively solve problems in our personal lives our organizations and our society before the next crisis unfolds blending history psychology and public policy written in blood is a compelling call to rethink how we manage risk before it s too late

for women who ve learned to be their own worst enemies this in your face guide offers powerful tools to break free from the cultural messages that feed negative body image readers will discover that not

only is their body capable strong and worthy of compassion and celebration it's also the key to unleashing their most authentic and radiant selves
